Hey Su, I got your message. In terms of what can be shared with the Director, you can let her know this:

EPA Region 7's Steve Kemp is able to provide a perspective on his experience with the Omaha Lead Superfund Site and he is able to bring in other members of their team in as necessary. He prefers a webinar/phone hook-up and would ask that we aim for the September CAG gathering given other commitments and need to prepare. He is waiting for their site attorney to get back from annual leave. There is a litigation hold in place and his attorney needs to give him a green light. Although he's fairly certain this will not be a problem, it's best to make sure before we share this externally.

What you can share on Thursday is that Region 9 is working with Region 7 to secure a presentation / discussion of the Omaha site. As soon as we get all the necessary approvals, we will let DTSC know so that it can be scheduled. We should know for sure in about a week.

Importance: High

Hi Deldi,

I got your voice message and hoping we can connect today – I am in the regional office today but can be reached at 916.972-9400

If we do not, I will let the director know that we have to wait to get the appropriate authorization [from attorney] before we discuss Omaha, Nebraska site.

Thanks

Su
